

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

[Early ME. *co(m)mun*, *a. OF. comun* (= *Pr.*, *Sp. comun*, *It. commune*): *L. commūn-is*. The derivation of the latter is doubtful; ? *f. com-* together + *-mūnis* (= *-mōinis*) bound, under obligation (cf. early Lat. *mūnis* obliging, ready to be of service, and *immūnis* not under obligation, exempt, etc.); or ? *f. com-* together + *-unus*, in early *L. oīnos* one. The former conjecture is the more tenable, esp. if *com-mōinis* was, as some suggest, cognate with OTeut. *ga-māini-s*, OHG. *gimeini*, OE. *gemēne*, in same sense. The ME. repr. of the latter, *IMENE*, was superseded by the Fr. *comun*; the accentuation *comu'n* is found as late as the 16th c. in verse; but before the date of our earliest quots. in the 13th c., the popular form had become *comun*, whence *co'myn*, *co'min*, *comen*, and the modern pronunciation. Chaucer and Gower have both; *comu'n(e)* being usual at the end of a line.]

c. In various semi-legal or statutory designations, as *common alehouse*, *common brewer*, *common carrier*, *common lodging-house*, etc., the original meaning appears to be 'existing for the use of the public' as opposed to 'private', recognized by the law as bound to serve the public; though other senses have become associated with this.

8. Said of criminals, offenders, and offences; as *common barrator*, *scold*, *swearer*; *common nuisance*, *common gaming-house*, etc.

(It is difficult to fix the original sense: those of 'public, apert, overt, confessed', 'the subject of common report', 'notorious', and 'habitual' appear all to enter in; in quot. 1365 *commune* has been explained as 'accustomed, wont', which comes near that of 'habitual'.)

b. *Common soldier*: an ordinary member of the army, without rank or distinction of any kind.

Ludlow mentions it as an example of the growing insolence of the Parliamentary army, that the men would no longer be called *common* but *private* soldiers. The latter is now the official expression, 'common' being liable to contemptuous associations, as in various other senses. So with *common sailor*; also *common carpenter*, *labourer*, etc., where the primary sense was prob. 'ordinary' (11).

OF. *comune-r* (in AF. also *comone-r*) to make common, impart, share, f. *comun* COMMON a. The shifting stress in OF. *comune-r*, *comue* (= L. types *communiā-re*, *commū-nat*), was reflected in ME. by the two forms *comun* and *comue* found side by side from the earliest times. The former became the more popular in ME., and was written *co'm mun*, *-on*, *-oun*, *-en*, *-yn*, *-in*, and finally like the adj., *comon*; it survived in some senses down to the 18th c. But the earlier senses mostly became obs. in the 16th c., with the exception of that of 'hold converse'; and here the form *commune*, which, though less usual in ME., had never become obsolete, now came to the front, being supported by the sb. *communion*, etc. *Common* and *commune* are thus only developments of the same word; but as they became very distinct in form, and their sense-history is not quite identical, *common* having taken from the cognate sb. and adj. some senses in which *commune* is never used, they are dealt with as distinct words.]

6. In some English colleges, as at Oxford and Winchester: One who pays for his commons, i.e. a student or undergraduate not on the foundation (called at Cambridge a *pensioner*).

The colleges were originally intended only for the fellows and scholars 'on the foundation', the admission of other students, as 'commoners' or boarders, being a subsequent development, which eventuated in the recognition of many ranks of students, as (at Oxford) *noblemen, gentlemen-commoners, fellow-commoners, commoners, bachelors, servitors*: q.v. These grades are now practically obsolete; and the only existing distinction is into *scholars*, or students on the foundation, and *commoners*. The latter word thus tends to be understood as 'common or ordinary undergraduate', i.e. one who has not gained a scholarship, exhibition, or other special distinction.

Civil actions at law brought by one subject against another. Used chiefly in connexion with, or as a contraction of, *Court of Common Pleas*, the

name of a court for the trial of civil causes, formerly one of the three superior courts of common law in England. This court, long seated at Westminster, was abolished in 1875; it was represented by the *Common Pleas Division* of the High Court of Justice until 1880, when that division was merged in the King's (or Queen's) Bench Division.

In earlier times the name of the court appears in the form *Common Place*; like the synonyms *Common Bench*, *Common Bank*, *Court of C. B.*, used interchangeably with it down to 16th c., this name may have originally had nothing to do with the word *pleas* (that is any reference to the *certo loco* of the Great Charter), but some confusion between *pleas* and *place* is evident at least in the 16th c.

1828 *WEBSTER s. v. Common*, In some of the American states, a *court of common pleas* is an inferior court, whose jurisdiction is limited to a county, and it is sometimes called a county court. It has jurisdiction of civil causes and of minor offenses; but its final jurisdiction is very limited. [In other cases, it has both civil and criminal jurisdiction over the whole state.]

Especially, at Oxford, where this use of the name originated, the college-parlour to which the fellows and others associated with them retire after dinner. Hence the members of this room, as a body.

OF. *commune-r*, to make common, share, f. *commun* COMMON *a.* As mentioned under COMMON v., this specially represents those forms of the OF. vb. in which the stress was upon the *u*, as 3 sing. pres. *commu ne* (=L. type *commūnāre*); the forms with the stress on the termination, e.g. *commune-r*, (=L. type *commūnā-re*, etc.) gave the ME. form *commun*, *common*. The latter was long the prevalent type in Eng., though *commune* never became obsolete; and in the 16th c., when the senses under I. became mostly obsolete, and those senses which were associated with *communism* survived, this became the accepted form. But a result of the two types *common* and *commune* remains in the two pronunciations *commune* and *commune*, of which the former is frequent in verse (Pope, Cowper, Wordsworth, Scott, Mrs. Browning; both forms are used by Shakespeare, Milton, Tennyson).

(In early prose quotations it is often impossible to say how *commune* was stressed. Hence some of the early quotes. here placed, may belong to COMMON vb., as do all those spelt *commun*, *commen*, *comyn*, *comon*.)

**Compass** (kmpās), sb. 1 (a. and adv.) Forms:

3-6 compase, 3-7-pas(e), 4-7-passe, (5 compas, 6 ooom-, ooompasse), 4-compass; also 3-6 cumpas, 4-pass, -pase, 4-6-passe, 5 Sc. compaisse, (8 oompase). [a. F. *compas* (12th c. in Littré) 'measure, pair of compasses, circle'; in mod.F. also 'mariner's compass'; = Pr. *compas*, Sp. *compas* 'pair of compasses, measure, rule of life, pattern', Pg. *compasso* 'pair of compasses', It. *compasso* 'a compass, a round, also a pair of compasses' (Florio); med.L. *compasus* = *circinus* pair of compasses (Du Cange). Cf. also Ger. *compass*, *kompass*, mariner's compass, formerly also gnomon, sun-dial, portable dial, Du. *kompas*, Sw. *kompass*, *kompass*, Da. *kompass*, Norw. *kompas*, (all) mariner's compass. (This is the exclusive sense in the Teutonic langs., as 'pair of compasses' is predominant in the Romanic.)

The history of this word and its associated verb in the Romanic langs. has not yet been determined, and it presents many points of uncertainty. It is doubtful whether the sb. is Common Romanic (the Sp. being app. from Fr. or Pr.), and as yet uncertain whether the sb. is derived from the vb., or the vb. from the sb. If the vb. was the origin, it would predicate a L. type \**compasus*, f. com- together or intensive + *passus* step, pace; if the vb. was the earlier, *compassare* would be 'to pass or step together' or 'completely' (see *Diex passare*), and \**compasus*, *compasso*, the action of doing so. The early history of the senses of the sb. is equally obscure: in OF., 'measure', primarily perhaps 'measure kept in walking together', 'artifice, subtlety', and 'pair of compasses', appear all to be early senses; it is at present impossible to say whether the instrument took its name from 'measuring' or from 'equal stepping'. It is probable that the sense 'circumference, circle, round' which is slightly exemplified in OF., but has received so great a development in Eng., is derived from the name of the instrument; but the converse is also possible; cf. L. *circinus* compasses, from *circus* round, etc.; also Ger. *zirkel*, (1) circle, (2) compasses. The later application to the Mariner's Compass, recognized in modern French, but chiefly developed in English and the Teut. langs., is also of obscure origin; it may easily have arisen out of the sense 'circle' or 'circuit', as showing the circle of the winds; but in German this sense appears to have been preceded by those of 'gnomon' and 'sun-dial', which may point in another direction. The Greek name of the *circinus* or compasses was *διαβήτης*, from *διαβαίνω* to stride or walk with the legs apart, to stride, step, or pass over: it is not impossible that *compassus* and *compassare* may have been employed to render these words, and as *διαβήτης* also meant the gnomon of a sun-dial, it is conceivable that this indicates the way in which *compassus* came to be used for dial, and mariner's compass.

The OF. senses all appear early in ME. In the uncertainty as to the relations between these, it is impossible to arrange them in any certain order in Eng., and that adopted is merely provisional, and subject to alteration when Romanic scholars shall have ascertained the previous history of the word in their own domain.]

[a. F. *compiler* (14th c. in Godef.) to put together, collect; (commonly taken as) —L. *compilā-re* to plunder, pillage, rob, steal, snatch together and carry off.

The history is by no means clear. In reference to literary 'compiling', *compilatōr* was applied reproachfully by rivals to Vergil, and this is commonly taken as = 'plunderer'; but Isidore (a. 640), in reference to this very circumstance, says 'Compilatōr, qui aliena dicta suis permiscet, sicut solent pigmentarii in pila diversa mixta contundere', where the etymological explanation 'to mix in a mortar', implies at least that no sense of 'plunder' any longer attached to the word. In med. L. Du Cange has *compilatōr* = 'extructus', said of an arch; Godef. has OF. *compilt* = 'constructed, built', of a palace, which seem also to point to some other derivation. **Compliment** (kəm'plīment), *sb.* Also 7 *complyment*. [Adopted in end of 17th c. from F. *compliment*, 16th c. ad. It. *complimento*, 'expression of respect and civility to another by words or by acts'. The L. *complimentum*, Romanic *complimento*, became in OF. *complément* (*compliment*), in It. *complemento*, with the original sense of 'filling

up, fulfilment, accomplishment'; in OCat. *complemento*, Sp. *complimiento*, there was a special development of use, as in the verb (see COMPLY), giving the sense 'observance or fulfilment of the requirements and forms of courtesy', which was adopted in It. in the form *complimento*, and thence passed into Fr. and Eng. *Compliment* is thus a doublet of COMPLEMENT (the form directly from Latin). The latter was in use in this sense about a century before the introduction of the French word, which slowly took its place between 1655 and 1715: see COMPLEMENT *sb.* 9, where the earlier history of this sense may be seen; cf. also COMPLY.

H. L'Estrange's *complyment*, *compliment* (in sense 1, 1b), appear to have been formed for the nonce on COMPLY, before *compliment* was in Eng. use. Cf. Skinner, 1668-71 'complement a Fr. compliment, It. complimento, hac verbo to comply, q.d. Compliments'.

(From 1700 to the present day nearly all editions of 16-17th c. works, whether re-issues of printed books or original editions from MS. (e.g. *Clarendon's History*, *Pepys' Diary*, *Letters of Dorothy Osborne*, etc.), systematically alter the original spelling *complement* into *compliment*, as do also modern dictionaries in their alleged quotations; only contemporary documents supply evidence as to the introduction of the French form.)

1. A ceremonial act or expression as a tribute of courtesy, 'usually understood to mean less than it declares' (J.); now, esp. a neatly-turned remark addressed to any one, implying or involving praise; but, also applied to a polite expression of praise or commendation in speaking of a person, or to any act taken as equivalent thereto: see the modern examples. In phrases, as *To pass, pay, make, etc. a compliment*. *To return the compliment*: to pay back compliment with compliment; to retaliate. *Chinese compliment*: see CHINESE.

**Complot** (kəmplot), sb. Now rare. In 6-plotte. [a. F. *complot*, 12th c. in Littré, in senses 'crowd, concourse, struggle', in 16th c. 'combined plan or design'. Of uncertain origin: see Diez and Littré. On the surface it looks like a compound of com-

and plot; but the latter does not occur in F. in a suitable sense (its ordinary meaning being 'block of wood', 14th c. in Godef.). Eng. plot in sense of complot is of about the same age, and perh. an abbreviation of this word.

In 16-17th c. poetry, *complot* and *complot* are used indifferently: Shaks. and Daniell have both. If plot was shortened from the word, it must have been from *complot*. This is the form recognized by Johnson; but 19th c. orthoepists in general have *complot*.

**Comply** (kəmplaɪ), v. Also 7-16. [Appears first about 1600. In sense 1, it answers to L. *complere* to fill up, fulfil, accomplish, COMPLETE. This verb became in Romanic *compiere*, whence It. *compiere*, *compiere*, Pr. and OF. *complir* (see COMPLISH), all in the original sense. But in OCat. *complir* or Sp. *cumplir*, the sense underwent the development 'to fill up, make up what is wanting, satisfy, satisfy the requirements or forms of courtesy' = *comply with*, in sense 2 below. In this latter sense, *compiere* appears to have been adopted in 16th c. Italian, by the side of the native *compiere* in the original sense; and the It. was evidently the immediate source of our sense 2. (In the same way the OCat. or Sp. form and sense of the derivative sb. *complimento*, *complimento*, was the source of It. *complimento*, and so of the 16th c. F. *compliment*, and 17th c. Eng. COMPLIMENT.) As to the form of *comply* cf. SUPPLY (L. *supplere*, It. *supplire*, OF. *soupleier* (15th c. *supplier*, *supplier*), late ME. *sowple*, 15th c. *supplie*, *supplie*, *supplie*). On the model of this, and with the same relation of form to L. *compiere*, It. *compiere*, that *supplie* bore to *supplere*, *supplire*, but without the same antecedent history, *comply* appears to have come into use in the end of the 16th c. (OF. *complir* was by that time obsolete.) In the sense-development in English there has been a tendency to association with *PLY*, Fr. *plier*, L. *plicare* to bend, so as to make 'bending to the will of another' a more prominent part of the notion: cf. esp. COMPLIANT.]

¶ The following misuse of the word inserted by Kersey in his ed. of Phillips, 1706, has been copied from Dictionary to Dictionary ever since; in some it is even given to the exclusion of the correct meaning. [1676 PHILLIPS (*App.* II, 'A Collection of such Affected Words from the *L.* or *Gr.* as are either to be used warily, and upon occasion only, or totally to be rejected as barbarous'), *Comprint*, to print another's Copy. 1706 — (ed. Kersey), To *Comprint* (*Law-Term*), this Word properly signifies to print together; but is commonly taken for the Deceitful Printing of another's Copy, or Book, by Stealth, to the prejudice of the rightful Proprietor. (Hence [with modifications] in KERSEY 1709-21, BAILEY 1726-7, JOHNSON 1755-6, and recent Dictionaries.) 1799 G. JACOB *New Law Dict.*, *Comprint* intends a surreptitious printing of another Bookseller's Copy, to make Gain thereby, which is contrary to the Stat. 14 Car. II. c. 33, and other Statutes. 1. The action of clearing a man from a charge or accusation by the oaths of a number of others (called from its use in the Canon Law, *Purgatio canonica*); also, more generally, Clearing or purgation from a charge, vindication; evidence or testimony to this effect.

1605 PHILLIPS, *Compurgation*, a Term in Law, a justifying by Oath the report or Oath of another. 1755 in JOHNSON. a 1670 HACKET *Abp. Williams* II. (1692) 35 [He] was privileged... from suspicion of Incontinency and needed no compurgation. 1868 BURNET *Hist. Ref.* II. 1818 SCOTT *Rob Roy* ix, I understand my evidence is necessary to the compurgation of an honest gentleman here. 1873 H. ROGERS *Orig. Bible* viii. 321 note, This fact is a sufficient compurgation from the charge.

2. esp. Applied by modern historians to the Old English mode of trial and purgation by means of the *æwdan* or *consacramentales*, then called *ðð-fultum*, 'oath-help' or 'oath-support' (in mod. Ger. *Eideshülfe*): see COMPURGATOR 1 b.

This mode of trial, so prevalent among the old Teutonic peoples, began to lose its importance as trial by jury and other processes came up in the 12th c., esp. after the Assize of Clarendon in 1166; but in privileged burghs, and in certain civil actions, e.g. for debt, it came down to modern times, being finally abolished only in 1833 by 2 & 3 Will. IV. c. 42 § 13. But the term *compurgation* was not known to the Common Law, where the technical name was *WAGER OF LAW*: the accused who claimed so to purge himself was said to *wage his law* (*vadiare legem suam*).

[1658-1755 see in 1.] 1830 KEIGHTLEY *Hist. Eng.* I. 78 The oath of a King's thane in compurgation was equivalent to those of six *Coerls*. 1867 FREEMAN *Norm. Cong.* (1876) I. vi. 514 Compurgation... was looked on as the surest proof of innocence. 1875 MAINE *Hist. Inst.* ii. 48 Such tests of truth as Ordeal and Compurgation.

**Compurgator** (*kompɜrɡətər*, *kompɜrɡətər*). Also 6-our. [a. med. L. *compurgator*, or F. *compurgateur* (14th c. in Godef.), n. of action f. L. *compurgare* to purge completely; in mediæval or modern times, app. taken as if from *com-* together with + *purgator* purger, clearer. (The second pronunciation is found in verse of 17-18th c.)]

1. A witness to character who swore along with the person accused, in order to the acquittal of the latter.

Originally a term of the Canon Law, appearing first, according to Du Cange, in the writings of Pope Innocent III (1198-1216), xvi. Ep. 158, and c. ix. and xiii. *de Purgatione Canonica*; it occurs in the *Corpus Juris Canonici*, in *Decret. Greg. IX* (1234-41) v. Tit. xxiv. c. v. vii. Earlier Latin names, referring to the laws of the Northern nations, were *Sacramentales* (Laws of Alemanni, Frisians, Longobards, etc.); *Consacramentales* (Capitula of Charlemagne, Laws of Cnut, and of Hen. I, c. 64, 66, 87); *Sacramentarii* (Pope John VIII, 872, 882); *Juratores*, *Conjuratores* (Salic & Alem. Laws, etc., etc.). In England the term *compurgator* appears to have been used only in ecclesiastical law until the 17th and 18th c., when legal antiquaries and historians began to apply it retrospectively in sense 1 b.

a. In Canon Law, Applied to witnesses who either swore to the credibility of the accused when he purged himself by oath, or otherwise swore to his innocence or orthodoxy, so as to clear him from a charge.

[c. 1340] ASP. STRATFORD in Lyndewode *Const. Prov.* v. Tit. 14 Pro graviore siquidem ut pro adulterio vel majori ultra duodecim manus Compurgatorum numerum non imponent. 1533 MORE *Debell. Salem* Wks. 380/5 That thordinary shoulde not put some man to that kinde of purgation which if he did, were hee neuer so noughty, he should be sure of compurgatours. a. 1556 CRANMER *Wks.* (Parker Soc.) I. 241 Where you take upon you... to purge yourself of papistry by me and Zuñgillus, if you have no better compurgators than us two, you be like to fail in your purgation. 1641 *Termes de la Ley* 105 When one shall wage his Law, He shall bring with him vi. vii. or xij. of his neighbours... to swear with him, much like unto the oath which they make which are used in the civil Law, to purge others of any crime laid against them, which are called compurgators. 1731 CHANDLER tr. *Limborch's Hist. Inquis.* II. 208. 1760 BURN *Eccle. Law* (1797) III. 276 By his own oath affirming his innocence, and the oaths of twelve compurgators as to the belief of it.

b. In reference to OE. times (and more generally to ancient Teutonic law), the usual term, with modern historians, for the 'oath-helpers' whom a person on trial was allowed to call in to swear that, to their belief, as neighbours of the accused and acquainted with his character, he was speaking truth in making oath of his innocence. Also, sometimes applied by modern legal writers to the same persons in Wager of Law.

A native name for the *consacramentales* (Ger. *eides-helfer*) is found only in the oldest Kentish Laws, viz. *Æwda*, pl. *æwdan* (L. of Hloðhære and Eadric 2, 4; L. of Wihtræd 23) evidently a deriv. of *æwe* 'law'. Elsewhere they appear merely as 'his zeferan' his fellows, 'þa þe him midstandð'. In OHG. *gieldo* (Hildeb. in Grimm) f. *eid* oath: cf. the latinized 'cum aidis suis' in Laws of the Longobards c. 364. The oath of the *æwdan* was 'On þone drihten, se æð is clæne and unsmæne þe N. swor' (Schmid, *Gesetze* 406).

1747 CARTER *Hist. Eng.* I. 367 Compurgators, who swore to their belief of the truth of what the criminal deposed himself. 1768 HUME *Hist. Eng.* I. App. 101 Compurgators, who... expressed upon oath that they believed the person spoke true. 1768 BLACKSTONE *Comm.* III. xxii. 343 The manner of making and waging law... And thereupon his eleven neighbours or compurgators shall avow upon their oaths that they believe in their consciences that he saith the truth; so that himself must be sworn *de fidelitate*, and the eleven *de credulitate*. 1809 TOMLINS *Law Dict.* s. v. *Wager*. 1860 C. INNES *Scott. Mid. Ages* 183. 1876 FREEMAN *Norm. Cong.* V. xxiv. 452 The compurgators of our oldest law were not a jury in the modern sense, but they were one of the elements out of which the jury rose. 1881 19th Cent. 386 The compurgators were simply witnesses to character... but the effect of their unanimous declaration of belief in his innocence was precisely that of a verdict of 'not guilty' by a jury.

**Con** (*kpn*), *v.*<sup>1</sup> Forms: 1 *cunnan*, 2-5 *cunne*, 3-6 *cunne*, 4-9 *cun*; also *kunne*, *n.*, *kun*; also 4-6 *cunnen*, (*oone*), 4-7 *oonne*, 6-*oon*. See more fully under CAN *v.*<sup>1</sup> [In the verb CAN the original vowel of the infinitive, and of all parts of the present stem except 1st and 3rd sing. pres. indic., was *u*: thus Inf. *cunnan*, ME. *cunne*, *n.*, *cun*; Ind. pres. 2nd sing. *cunne*, later *cunnet*, pl. *cunnon*, ME. *cunne* (*n.*, *cun*); Conj. pres. *cunne*, pl. *cunnen*; pr. pple. *cunnand*, ME. *-end*, *-ing*; vbl. sb. *cunning*. These *u* forms survived more or less all through the ME. period: see CAN *v.*<sup>1</sup> A.; but in accordance with the scribal practice of writing *o* for *u*, in contact with *m*, *n*, *u* (*v*), *w*, they were often spelt *cunnen*, *conne*, *con*; the pronunciation is however proved by numerous rimes with *sonne*, *sonne*, *son* (= *son*), *sonne*, *son* (= *sun*), *yronne* (= *y-run*), *wonne*, *won* (OE. *winian*), etc. The form of the 1st and 3rd sing. *I can*, *he can*, also varied from OE. times with *con* (*cpn*), the regular Old WS. type (see Sievers *Agg. Gramm.* § 65). *I con* (in *Cast. Loue* 1071, riming with *for-pone*) is found for *I can* in some texts even after 1400; but long before this *can* prevailed as the midland and northern form, at least in senses 1 and 2. The vowel-type of the 1st and 3rd sing. pres. ind. was gradually extended to the 2nd sing. (*cpnst*, *caust*), the plural (*we cpn*, *can*), the conj. pres., and the infin. (*cpn*, *can*)—the last in Standard Eng. only from end of 15th c. The *u* forms thus remained intact only in the pple. and vbl. sb. *CUNNING*, q.v. About the same time a differentiation of forms and senses became manifest: *can* became established in sense 2 'to be able', and predominant in sense 1 'to know'; but *cun*, *con*, were retained and extended to all parts in sense 3 'to learn', and the phrase *to cun* or *con* thanks, sense 4. This *cun*, *con*, was mainly the representative of ME. *cunne* or *conne* from OE. *cunni* (= *kun*); but in part it represented ME. *con*, from OE. *cpn*, for *con* (= *kpn*); hence it survived in two forms, *cun*, which is still common dialectally in 'to cun thanks', and *con*, which was the form in literary favour, both in the obs. 'to con thanks', and the still existing sense 'to con or learn a lesson'. This *con* is not a mere spelling variant of *cun*, as ME. *conne* was of *cunne*; but, from Spenser onward, *con* rimes with *con*, *conned* with *fond*, which is still the received pronunciation. The original pa. t. was *cude*, *coulde*, *coud*, *could* (see CAN *v.*<sup>1</sup>); but already in 14th c. in the phrase *to cun thanks*, sense 4, we find a pa. t. *cunde*, *conned*, with corresp. pa. pple.; at the differentiation of forms this was associated with *cun*, *con*, leaving *coud*, *could* to CAN *v.*, so that CON is now a regular weak verb *con*, *connest*, *conneeth*, *cons*, *conned*. Thus there remains no consciousness of connexion between *can* to be able, and *con* to learn. The earlier quotations however overlap the ground covered by CAN *v.*<sup>1</sup>, and are given as supplementary to those under that word, and introductory to the later use of *con*, *cun*.]

|| **Con**, *prep.* Italian:—L. *cum* with, appearing in certain phrases, as *CON AMORE*, q.v.; esp. in musical directions,

e.g. *con affetto* with feeling, *con brio* with spirit and force, *con delicatezza* with delicacy, *con delirio* with frenzy, *con espressione* with expression, *con fuoco* with fire, *con moto* with spirited movement, *con spirito* with spirit, etc.

**Con-** prefix, of Latin origin. The form assumed by the Latin preposition *com* (in classical L., as a separate word, *cum*) before all consonants except the labials, *b*, *p*, and (in later times) *f*, as *con-*culture, *condonare*, *confuere*, *congruere*, *conjurare*, *conquirere*, *consistere*, *conspirare*, *constare*, *contrahere*, *convincere*. In earlier times it was also used before *l*, as *conloquium*; but here it was in later times always assimilated, as *colloquium*, and so in the modern langs. On the other hand it was not used in classical L. before *n* (e.g. *conatus*, *conubium*, etc.), but has been introduced subsequently, as *conatus*, *conubium*, and this spelling is followed in English. For meaning, see *COM*.

**Con-** occurs in compounds formed in Latin, and that have come into English through French, or (in later times) directly. Also, in words formed on the analogy of these, and sometimes in casual combinations, as *conspicuous*, where, however, *Co-* is the usual prefix: hybrids, frequent in *co-*, are rare with *con-*: cf. *con-brethren*, *con-truth*.

In OF. *con-* before *v* was often reduced to *cu-*, *cou-*, as in *covenant*, *covenant*, *coveiter*, *coveitus*, etc., in which form these words were taken into English. Following later French, some of these were afterwards altered back to *con-*, as *convenient*, *convent* (but *Convent Garden*, *F. convent*); others retain *co-*, as *covenant*, *covet*, *covetous*, against mod. F. *covenant*, *convoiter*, *convoiteux*.

It is a right to plant a crop, paying sometimes 6, 8 or 10 pounds an acre for that right by the single year, and the crop is detained till that rent is made up. 1827 *Westm. **Concert** (kɒnsə't), *v.* [ad. F. *concerte-r* (16th c.), ad. It. *concertare* to proportion or accord together, to agree or tune together, to sing or play in concert.

The Italian is identified by Diez with L. *concertare* intr., to contend zealously, dispute, debate. Such a change of sense might conceivably come about through an intermediate 'argue out, settle by debate,' whence 'come to terms, arrange terms'; but evidence is wanting. Florio has, in 16th c. It., *concerto, concertare*, as parallel forms of *concerto, concertare*; these (if real words) point to L. *concertare* freq. of *concerte* 'to join or fit together, connect'; the same origin has been claimed by Spanish etymologists for Sp. *concertar* which has among other senses 'to mend a thing broken'. But here the phonetic change is unexplained. Already in 16th c. It. *concerto* was associated in the musical sense with *concerto* (CONCERT); Florio, 1598, gives *concerto* merely with a cross-reference to *concerto*. Hence a conjecture that *concerto, concertare* were perversions of *concerto, concertare*, under the influence of *concerto*: but what then of Sp. *concertar*?

4. Applied by the early logicians and grammarians to a quality viewed (as it is actually found) *concreted* or adherent to a substance, and so to the word expressing a quality so considered, viz. the adjective, in contradistinction to the quality as mentally abstracted or withdrawn from substance and expressed by an abstract noun: thus *white* (paper, hat, horse) is the concrete quality or quality in the concrete, *whiteness*, the abstract quality or quality in the abstract; *seven* (men, days, etc.) is a concrete number, as opposed to the number 7 in the abstract.

Afterwards *concrete* was extended also to substantives involving attributes, as *fool, sage, hero*, and has finally been applied by some grammarians to all substantives not abstract, i.e. all those denoting 'things' as distinguished from qualities, states, and actions. The logical and grammatical uses have thus tended to fall asunder and even to become contradictory; some writers on Logic therefore disuse the term *concrete* entirely: see *quot.* 1887. In this Dictionary, *concr.* is prefixed to those senses in which substantives originally abstract come to be used as names of 'things'; e.g. *crossing* vbl. sb., i.e. abstract n. of action, *concr. a crossing* in a street, on a railway, etc.

From an early period used as a quasi-sb., a concrete (*sc. term*).

The Scotists maintain that it is possible for man in his  
natural state so to live as to deserve the Grace of God, by  
which he may be enabled to obtain salvation; this natural  
fitness (*congruitas*) for grace, being such as to oblige the  
Deity to grant it. Such is the merit of congruity. The  
Thomists, on the other hand, contend that man, by the  
divine assistance, is capable of so living as to merit eternal  
life, to be worthy (*condignus*) of it in the sight of God. In  
this hypothesis the question of previous preparation for the  
grace which enables him to be worthy, is not introduced.  
This is the merit of condignity.
